

FA-300 400THF-Desktop screen printer with Vacuum

- A dual-purpose screen printing machine that can use both the suction platform and the regular platform for securing various jigs. The changeover is quick and easy, making it versatile and suitable for a wide range of printing applications.
- Suction Platform: The screen printing machine is equipped with a suction platform that automatically engages when the sliding table moves forward, making it simple and convenient to use.
- The machine's platform can be adjusted in the X, Y, and Z axes and angles. The platform can also move forward and backward, ensuring that the line of sight is not obstructed when placing or removing printed items.
- Magnetic Squeegee Clip: Utilizing a magnetic squeegee clip (Patent No. M390871), adjustment or disassembly is easy.
- The speed of the sliding table's forward and backward movement is adjustable, as are the left and right movement speeds, which enhances printing productivity.
- During printing, the screen stencil does not lift, eliminating the need to raise it. This feature prevents screen blockages, reduces dust and lint adhesion, and significantly saves ink!
- Ideal for Entry-Level Semi-Automatic Screen Printing: Compact and lightweight, it can be placed directly on a desktop, making it convenient to transport and cost-effective.
- Pneumatic Cylinder Ink Scraping: Ensures stable and effortless operation.
- This semi-automatic screen printing machine is the preferred choice for novice, offering the affordability.

3 years warranty
